Most enterprises aren't **modernising**

They're patching around systems. Hoping they

Swipe →

You can't migrate what you can't see.

8–12 weeks in teams still don't know what

Nobody documented the rules

The people who built these systems have **moved on**

Staying put isn't conservative

Every year you defer,

the risk compounds

Seven specialised AI agents

Hours, not months

- Every business rule extracted in **plain English** — every dependency mapped. SME reliance removed.

Your logic. Visible for the first time

Pricing rules, eligibility, product controls

— structured and governed

Migrate layer by layer

No concentrated risk. No big-bang cutover.

You build a **smarter system — not a replica**

Green Screens → React · JCL → Springboot

Batch → Spring Batch · Rules → Policy Admin

Let's Connect →

See your system through AIDAP in 48 hours

A structured discovery session — your architecture team, our agents. One system domain mapped. **No commitment.**
