Mainframe Modernisation

Most enterprises aren't modernising.

They're adding to them. Patching around them. Hoping they hold.

8–12

weeks in — teams still don't know what they're migrating.

The rules are buried. The logic is fragmented.

Nobody documented it.

Nobody documented the rules.

The people who built these systems have moved on.
New teams can't access that knowledge with confidence.

Staying put isn't conservative.

Every year you defer,

the risk compounds quietly.

Seven specialised AI agents.

Hours, not months.

- Every business rule in **plain English** — every dependency mapped. SME reliance removed.

Your logic. Visible for the first time.

Pricing rules, eligibility, product controls — **structured and governed.**

Migrate layer by layer.

No big-bang cutover. Build a smarter system —

not a replica.

Green Screens → React · JCL → Springboot
Batch → Spring Batch · Rules → Policy Admin

Let's Connect

See your system in 48 hours.

Discovery session. Your architecture team, our agents.
One domain mapped. **No commitment.**
