SCALING ENTERPRISE OPERATIONS

# How to Build an Agentic Operating Model

Move beyond point solutions to an intelligent operational fabric with AiDAP.

AIDEN AI

THE SCALING CRISIS

# Traditional ops models are broken.

Fragmented systems and manual coordination are creating a complexity ceiling.

AIDEN AI

INTRODUCING AIDAP

# A Unified Operational Fabric.

Orchestrate agents, memory, and logic to handle routine work autonomously.

AIDEN AI

THE AGENT HIERARCHY

# Master & Deep Agents.

A Master Agent orchestrates specialized Deep Agents dynamically for every task.

AIDEN AI

ENTERPRISE MEMORY

# Grounding in Context.

Our knowledge graph ingests millions of pages to give agents "operational memory."

AIDEN AI

COST-EFFECTIVE INTELLIGENCE

# Smart Inference Layer.

Intelligently switch between models to balance performance and operating costs.

AIDEN AI

TRUST & CONTROL

# Human-in-the-Loop Governance.

Agents handle the volume; humans govern the high-risk exceptions.

AIDEN AI

FINANCE & SALES OPS

# Beyond Automation.

Automate invoices, lead qualification, and CRM hygiene with agentic reasoning.

AIDEN AI

MARKETING & BACK-OFFICE

# Global Scale.

Streamline campaign planning and document verification at enterprise production scale.

AIDEN AI

NEXT STEPS

# Ready to scale your intelligence?

Design your agentic operating model at aiden.ai/operations
