DATA MIGRATION

Your migration isn't a data problem.

It's a tooling problem.
And it's been unsolved for 20 years.

Aiden AI

THE REALITY

Manual migration costs months. And millions.

Schema analysis, mapping, validation — all done by hand. Until now.

THE SHIFT

From manual effort to intelligent automation.

Aiden's AI agents handle what used to take your best engineers weeks.

01 — DISCOVER

AI finds what you didn't know was there.

Auto-analyze legacy stores, schemas, relationships. No manual assessment.

02

02 — DESIGN

Target schemas built by context, not guesswork.

Business context + historical patterns = intelligent modernization design.

03

03 — MAP & TRANSFORM

Zero-touch mapping. Production-grade rules.

Auto-generate mappings, transformations, and data quality validations.

Aiden AI

04

04 — EXECUTE

Pipelines generated. Migration orchestrated.

Batching, scheduling, retry logic — built in, not bolted on.

05

05 — VALIDATE & GOVERN

Every record. Every step. Auditable.

Continuous validation, anomaly detection, full compliance traceability.

THE OUTCOME

50–70% less effort. Zero surprises.

Faster timelines. Fewer defects.
Lower risk. Production-scale confidence.

Move to modern. Faster.
